

# Grab n' Build

Online Store

# What is Grab n' Build all about?

Grab n' Build is an online store that aims to serve the growing need for computer parts.

We provide the customer with several types of products that they can choose from including processors, graphics cards, and many others.

# Stakeholders

We're looking to attract a wide range of customers, from computer gamers to desk-job workers.

We believe that we can influence people to make the switch from regular physical stores to an online store by offering them competitive and fair prices.

By being stakeholders ourselves, we consider that we developed the product with the needs of the customers in our minds.
